

VisionAI Dynamics

VisionAI Dynamics · Version 1.1 · 2026

This document presents VisionAI Token (VAI) the utility-based loyalty rewards token powering the VisionAI Smart Glasses ecosystem. VAI is built on the Solana blockchain and is designed to reward customers, incentivize engagement, and create a transparent, customer-owned digital loyalty economy.

IMPORTANT NOTICE

VisionAI Token (VAI) is a utility token. It does not constitute a security, investment contract, share, or financial instrument of any kind. This whitepaper is for informational purposes only and does not constitute financial or legal advice. Please consult qualified advisors before making any decisions related to digital assets.

1. EXECUTIVE SUMMARY

VisionAI Dynamics is building the next generation of AI-powered smart glasses, integrating ChatGPT-5 technology to deliver an intelligent augmented reality experience for professionals, students, and technology enthusiasts worldwide.

To deepen customer loyalty and create a transparent, blockchain-based rewards ecosystem, VisionAI Dynamics is introducing VisionAI Token (VAI) a Solana-based SPL utility token with a fixed maximum supply of 21,000,000 tokens.

VAI transforms everyday interactions with VisionAI products into tangible digital rewards that customers genuinely own, control, and can redeem for real value within the ecosystem.

VAI tokens are earned by customers through qualifying actions: purchasing Smart Glasses, renewing subscriptions, referring new users, and participating in product testing programs. Earned tokens are redeemable for discounts, premium features, and exclusive merchandise all tracked transparently on the Solana blockchain.

Token Name	VisionAI Token
Ticker	VAI
Blockchain	Solana
Token Standard	SPL (Solana Program Library)
Maximum Supply	21,000,000 VAI
Decimals	9
Token Type	Utility Token Loyalty Rewards
DEX	Raydium / Jupiter

2. THE PROBLEM WE SOLVE

Traditional Loyalty Programs Are Broken

The global loyalty program market exceeds \$6 trillion annually, yet customer satisfaction with these programs remains chronically low. Three structural problems undermine every traditional loyalty system:

- Lack of transparency customers have no visibility into how points are calculated, valued, or managed. Companies can change reward values, devalue points, or close programs without notice.
- No true ownership loyalty points are liabilities on a company's balance sheet, not assets in a customer's hands. They can be revoked, expired, or cancelled unilaterally.
- Zero portability points are locked into a single ecosystem, cannot be transferred between users, and have no value outside the issuing company.

The Crypto Opportunity

Blockchain technology solves all three problems simultaneously. By issuing loyalty rewards as an on-chain token, VisionAI creates a system where every reward is publicly verifiable, permanently recorded, and fully customer-owned. VAI tokens cannot be revoked, cannot expire, and can be freely transferred between users.

VisionAI Token combines the familiarity of loyalty rewards with the security and transparency of blockchain without requiring customers to understand crypto to benefit from it.

3. VISIONAI SMART GLASSES

Product Overview

VisionAI Smart Glasses are AI-powered augmented reality eyewear that seamlessly overlay digital intelligence onto the physical world. At the core of every pair is a deep integration with ChatGPT-5, enabling natural, conversational AI assistance in real time.

Feature	Description
ChatGPT-5 Integration	Natural language AI assistant for information retrieval, translation, and contextual assistance
AR Display	High-resolution augmented reality overlay for hands-free digital information
Voice Recognition	Advanced voice control for fully hands-free operation
Real-Time Translation	Instant language translation displayed in the AR field of view
Device Connectivity	Seamless pairing with smartphones, tablets, and computers
Ergonomic Design	Lightweight, comfortable design suitable for all-day professional wear

Target Markets

- Healthcare & Medical clinical note-taking, patient record access, surgical guidance
- Logistics & Field Services inventory management, navigation, hands-free documentation
- Education & Research real-time research assistance, language learning, collaborative study
- Enterprise & Productivity meeting support, instant translation, workflow automation
- Technology Enthusiasts early adopters seeking the leading edge of AI wearable tech

Revenue Streams

- Hardware Sales direct sales of VisionAI Smart Glasses to consumers and enterprises
- Subscription Services monthly and annual premium plans for advanced AI features
- Enterprise Solutions bulk licensing and customised deployments for businesses
- Developer Platform API access for third-party application developers

4. VISIONAI TOKEN (VAI)

What is VAI?

VisionAI Token (VAI) is an SPL utility token deployed on the Solana blockchain. It serves as the loyalty and rewards currency of the VisionAI ecosystem earned by customers through engagement with VisionAI products and services, and redeemable for tangible rewards within the platform.

VAI is not an investment product. It does not represent equity, ownership, or a share of VisionAI Dynamics' profits or assets. It is a digital utility token with a specific and defined use case within the VisionAI product ecosystem.

Why Solana?

Solana was selected as the underlying blockchain for VAI due to its exceptional combination of speed, cost, and ecosystem maturity:

- Transaction speed: up to 65,000 transactions per second
- Transaction cost: approximately \$0.001 per transaction negligible for end users
- Energy efficiency: Solana uses Proof of History (PoH), consuming a fraction of the energy of Proof of Work chains
- Ecosystem: home to leading DEXs including Raydium and Jupiter, with millions of active wallets
- Reliability: battle-tested infrastructure with institutional-grade uptime

Token Utility

VAI tokens have clearly defined utility within the VisionAI ecosystem:

Use Case	Details
Discount Redemption	Redeem VAI for percentage discounts on Smart Glasses purchases
Subscription Credits	Use VAI to pay for or extend VisionAI Premium subscriptions
Early Access	VAI holders gain priority access to new firmware, features, and products
Exclusive Merchandise	Redeem VAI for limited-edition VisionAI branded accessories
Priority Support	VAI balances unlock tiered customer support access
Governance (future)	Token holders may vote on product features and ecosystem decisions

5. TOKENOMICS & SUPPLY

Supply Structure

VAI follows a fixed-supply model inspired by Bitcoin, with a hard cap of 21,000,000 tokens. Once the full supply has been minted, no additional VAI can ever be created. The mint authority will be permanently revoked on-chain at the time of initial deployment, making this limit cryptographically enforced and irreversible.

Parameter	Value
Maximum Supply	21,000,000 VAI
Initial Circulating Supply	To be determined at launch
Mint Authority	Revoked at deployment supply is permanently fixed
Decimals	9 (standard for Solana SPL tokens)
Token Standard	Solana SPL
Contract Verified	Publicly verifiable on Solscan

Token Allocation

The VAI token allocation is designed with a single guiding principle: the community comes first. Of the total 21,000,000 VAI supply, 85% is allocated to customer rewards, public liquidity, and ecosystem growth. All insider allocations team, reserve, and marketing combined total just 15%. This is intentionally below the industry average of 20–35% for insider holdings, and reflects VisionAI's belief that a token's long-term success depends on genuine community ownership.

Allocation	Percentage	Amount (VAI)	Purpose
Loyalty Rewards Pool	50%	10,500,000	Customer rewards distributed over time for qualifying actions
Public Liquidity	35%	7,350,000	Raydium/Jupiter DEX liquidity enables open market trading
Team & Founders	7%	1,470,000	Founding team vested over 24 months with 6-month cliff
Company Reserve	5%	1,050,000	Operations, strategic partnerships, future development, and marketing — this allocation is not locked and is available for immediate use
Marketing & Ecosystem	3%	630,000	Community growth, influencer campaigns, ecosystem grants

85% of all VAI goes directly to customers, liquidity, and ecosystem growth. Insider allocations total just 15% well below the industry average because VisionAI believes this token belongs to its community.

Why Only 15% for Insiders?

Most crypto projects allocate between 20% and 40% of their token supply to founding teams, investors, and company reserves. VisionAI has deliberately chosen a lower figure for three reasons:

- Trust a low insider allocation signals that the team is not building VAI to enrich themselves, but to create genuine value for VisionAI customers. When 85 cents of every token dollar belongs to the community, it is clear where VisionAI's priorities lie.
- Stability lower insider holdings mean less potential sell pressure at launch. When team tokens represent a smaller share of the total supply, the risk of large coordinated sell-offs is significantly reduced, protecting the token's value for all holders.
- Sustainability the Loyalty Rewards Pool holds 50% of all VAI. This ensures that the rewards programme can run for years without requiring new token issuance. The fixed supply and conservative insider allocation work together to protect the long-term value of every VAI token earned by customers.

Allocation Breakdown Insider Wallets

The 15% insider allocation is divided across three distinct wallets, each with a specific and transparent purpose:

Wallet	%	VAI	Purpose & Justification
Team & Founders	7%	1,470,000	Compensates the founding team for building VisionAI Token. Fully vested over 24 months the team cannot sell a single token for the first 6 months after launch.
Company Reserve	5%	1,050,000	Held by VisionAI Dynamics. This allocation is not subject to a lock-up period and is immediately available for operational use, including marketing campaigns, exchange listings, technology partnerships, legal costs, and operational continuity.
Marketing & Ecosystem	3%	630,000	Allocated for community growth: influencer campaigns, developer grants, exchange listing fees, and ecosystem incentive programmes.

Vesting Schedule

All team and founder tokens are subject to a strict 24-month vesting schedule with a mandatory 6-month cliff period. This means that no team member can sell, transfer, or use any VAI for the first 6 months following the public launch. After the cliff, tokens are released linearly over the remaining 18 months. This schedule is enforced on-chain via a third-party vesting protocol and is publicly verifiable at any time.

The Company Reserve and Marketing wallets are multi-signature wallets requiring approval from multiple team members for any transaction. All movements from these wallets will be announced publicly in advance, providing the community with full transparency over how insider tokens are used.

6. LOYALTY REWARDS SYSTEM

How It Works

The VAI loyalty system is designed to be simple for customers to use, even without prior knowledge of cryptocurrency. When a customer completes a qualifying action such as purchasing Smart Glasses or renewing a subscription the VisionAI platform automatically verifies the action and issues VAI tokens directly to the customer's linked wallet.

Qualifying Actions & Reward Rates

Action	VAI Reward	Verification Method
Smart Glasses Purchase	100 VAI	Order ID confirmation
Annual Subscription Purchase	75 VAI	Subscription record
Monthly Subscription Renewal	15 VAI	Billing cycle record
Successful Referral	75 VAI	Unique referral code + purchase
Referee Bonus (referred user)	25 VAI	Applied at first purchase
App Store / Play Store Review	10 VAI	Review ID verification (once)
Beta / Firmware Testing	25 VAI	Per completed testing cycle
Community Event Participation	5–20 VAI	Event registration + attendance

Redemption

VAI tokens are redeemable directly within the VisionAI app and website. Customers can check their balance, view transaction history, and redeem tokens at any time. The redemption rate (VAI per dollar of value) is set by VisionAI and reviewed periodically to ensure the rewards remain meaningful and sustainable.

Customer Experience

VisionAI is committed to making the loyalty experience seamless. Customers who prefer not to manage a crypto wallet can opt into a custodial account VisionAI holds the tokens on their behalf within the app, and they interact with VAI exactly as they would with any other loyalty points system. Customers who prefer self-custody can connect any Solana-compatible wallet (e.g. Phantom, Solflare).

7. SOLANA BLOCKCHAIN & TOKEN DEPLOYMENT

Deployment Overview

VAI is deployed as an SPL (Solana Program Library) token the standard token format on Solana, equivalent to ERC-20 on Ethereum. SPL tokens are natively supported by all major Solana wallets, DEXs, and infrastructure providers.

Component	Technology / Provider
Blockchain	Solana Mainnet-Beta
Token Standard	SPL Token Program
Token Metadata	Metaplex Token Metadata Standard
Decentralised Exchange (primary)	Raydium Standard AMM Pool
Swap Aggregator	Jupiter Exchange
Wallet Compatibility	Phantom, Solflare, Backpack, and all SPL-compatible wallets
Block Explorer	Solscan.io
Asset Storage (metadata/logo)	IPFS via Pinata

Security Measures

- Mint authority permanently revoked at deployment no additional tokens can ever be minted
- Token metadata verified and published on-chain via Metaplex
- Smart contract (token mint address) publicly verifiable on Solscan
- Team tokens locked and vested via a third-party vesting protocol
- Liquidity pool lock considered for initial launch period

8. ROADMAP

Phase	Timeline	Milestones
Phase 1 Foundation	Q4 2026	VAI token deployment on Solana mainnet · Mint authority revoked · Token metadata live · Solscan verification
Phase 2 Launch	Q1 2027	Raydium liquidity pool live · Jupiter token listing approved · VisionAI app wallet integration · Loyalty engine API deployed
Phase 3 Growth	Q2 2027	CoinGecko & CoinMarketCap listing · Community Discord & Telegram · Referral programme live · 10,000 VAI wallets target
Phase 4 Ecosystem	Q3 2027	Governance voting for token holders · Partner merchant VAI acceptance · Mobile wallet app · 50,000 VAI holders target
Phase 5 Scale	2028+	Cross-chain bridge exploration · VAI developer grants programme · International market expansion · Smart Glasses Gen 2 launch

9. TEAM & VISION

Our Team

VisionAI Dynamics is led by a multidisciplinary team combining expertise in artificial intelligence, blockchain technology, hardware engineering, and enterprise software. The team's collective experience spans leading technology companies and successful technology ventures.

Role	Responsibilities
Chief Executive Officer	Company vision, investor relations, strategic partnerships, and go-to-market strategy
Chief Technology Officer	Blockchain architecture, Solana integration, smart contract deployment, and security
Head of Product	Smart Glasses product development, AI integration, and user experience design
Head of Marketing	Brand strategy, community growth, influencer partnerships, and token launch campaigns
Lead Blockchain Developer	SPL token deployment, Metaplex metadata, Raydium pool management
Legal Counsel	Regulatory compliance, token structure advisory, intellectual property, and data privacy

Our Vision

"We believe the future of personal technology is intelligent, wearable, and connected. VisionAI Token is not just a loyalty programme it is the foundation of a customer-owned digital economy built around the world's most advanced smart glasses."

VisionAI Dynamics is committed to building technology that genuinely improves how people work, learn, and communicate. Every product decision from the AI models we integrate to the blockchain we chose is made with our customers' best interests at the centre.

10. LEGAL & COMPLIANCE

Token Classification

VisionAI Token (VAI) is a utility token. It provides access to specific features and services within the VisionAI product ecosystem. VAI does not represent equity, ownership, profit participation, voting rights in VisionAI Dynamics, or any claim against the assets of the company. VAI is not a security under the definitions of any jurisdiction known to VisionAI Dynamics at the time of publication.

No Investment Advice

This whitepaper does not constitute investment advice, financial advice, legal advice, or any other form of professional advice. The information contained in this document is for informational purposes only. Readers are strongly encouraged to consult their own qualified financial, legal, and tax advisors before making any decisions in relation to VAI or any other digital asset.

Risk Disclosure

Digital assets including VAI carry inherent risks. These include, but are not limited to: market volatility, regulatory change, technology risk, smart contract risk, and liquidity risk. The value of VAI within or outside the VisionAI ecosystem is not guaranteed. VisionAI Dynamics makes no representations about the future value of VAI tokens outside of their defined utility within the VisionAI platform.

Regulatory Compliance

VisionAI Dynamics is committed to operating in compliance with applicable laws and regulations in all jurisdictions in which it operates. The company monitors the evolving regulatory landscape for digital assets and utility tokens and will update its compliance posture accordingly. VAI is not available for purchase or use in jurisdictions where such activity is prohibited by law.

Compliance Area	Status
Token Classification	Utility token not classified as a security
KYC / AML	Applied where required by applicable regulations
Data Privacy	GDPR-compliant data handling for EU users
Smart Contract Audit	Scheduled prior to mainnet launch
Legal Opinion	Obtained from qualified blockchain legal counsel
